**Note:** If there is >260 linear feet or >160 square feet of Regulated Asbestos-Containing Material (RACM) in the building to be demolished, it must be removed by a licensed asbestos contractor prior to demolition. The State of MN-Notice of Intent to Perform an Asbestos Abatement Project <http://www.pca.state.mn.us/publications/w-sw4-06.doc> must be used to notify for the asbestos removal.

Is nonfriable ACM present in the structure to be demolished?  Yes  No

Will nonfriable ACM be present in the structure at the time of demolition?  Yes  No

If **Yes** to both questions above, complete Items 1-9. If **No** to either question, complete Items 3-9.

1. If ACM will be left in place for the demolition indicate the amount of Category I and/or Category II nonfriable ACM left in place.

Category I: \_\_\_\_\_ Linear feet  
 \_\_\_\_\_ Square feet  
 \_\_\_\_\_ Cubic feet

**Category I nonfriable ACM** means asbestos-containing packings, gaskets, resilient floor covering, and asphalt roofing products containing more than one percent asbestos.

**Category I nonfriable ACM is not allowed to remain in place for demolition if it is in poor condition.**

Category II: \_\_\_\_\_ Linear feet  
 \_\_\_\_\_ Square feet  
 \_\_\_\_\_ Cubic feet

**Category II nonfriable ACM** means any material, excluding Category I nonfriable ACM, containing more than one percent Asbestos that, when dry, cannot be crumbled, pulverized, or reduced to a powder by hand pressure.

**Category II nonfriable ACM is not allowed to remain in place for demolition if it has a high probability of becoming crumbled, pulverized, or reduced to a powder during demolition, transport, or disposal (e.g., transite, cement, slate roofing).**

2. Description and location of ACM remaining in place (including number of floors and rooms):

\_\_\_\_\_  
\_\_\_\_\_

3. Company and/or individual that conducted the building inspection and the procedure used to determine the presence or absence of ACM (including analytic method): (Note: Prior to demolition all structures must be inspected by a licensed asbestos inspector who has been certified through the Minnesota Department of Health.)

\_\_\_\_\_  
\_\_\_\_\_

4. Description of planned demolition and the specific method(s) that will be used:

\_\_\_\_\_  
\_\_\_\_\_

5. If the demolition was ordered by a government agency, please identify the agency and attach a copy of the order:

Name: \_\_\_\_\_ Title: \_\_\_\_\_

Authority: \_\_\_\_\_

Date of order (mm/dd/yy): \_\_\_\_\_ Start date (mm/dd/yy): \_\_\_\_\_

Notification for an emergency demolition must be submitted as early as possible before demolition begins, but not later than the following working day. A demolition is considered an emergency **only** when the facility has been deemed structurally unsound and in danger of imminent collapse. If the structurally unsound building is known to contain any regulated ACM or is suspected to contain any regulated ACM, special procedures **must** be followed. If you are unaware of the special procedures, instructions/ regulations can be obtained by contacting the Minnesota Pollution Control Agency (MPCA) at the address or phone number listed below.

6. Description of procedure to be followed in the event that unexpected RACM is found or Category II nonfriable ACM becomes crumbled, pulverized or reduced to powder:

7. Demolition waste transporter(s) information:

Transporter name: \_\_\_\_\_

Contact name: \_\_\_\_\_

Tranporter address: \_\_\_\_\_

City, State, Zip: \_\_\_\_\_
